COUNTRY East Germany REPORT NO TOPIC Schoenwalde Airfield		Approved For Release 2003/02/27: CIA-RDP80-00810A001700570009-2 . CLASSIFICATION_SEGRET SECURITY INFORMATION	· · · · · ·
TOPIC Schoemwalde Airfield EVALUATION see below PLACE OBTAINED 25X1C DATE OF CONTENT DATE OBTAINED DATE PREPARED 10 June 1953 REFERENCES PAGES 2 ENCLOSURES (No. & TYPE) REMARKS SOURCE 25X1X 1. The following observations were made at Schoemwalde airfield between 5 and 18 Nay 1953: 5 Nay, At 11:30 p.m., a multi-engine aircraft landed at the field while the airfield lights were switched on. 6 to 9 Nay. There was no air activity. Three twin-engine semi-high-wing monoplanes with tail wheels and double rudder assemblies, apparently Tu-2s, were parked in the southern section of the field. 10 Nay. At about 11 a.m., a Fo-2 took off. 11 Nay. Between 7 a.m. and 10 a.m., individual Tu-2s circled the field for about 15 minutes. At about 10:30 a.m., 3 Tu-2s took off heading south. The planes were not observed landing at the field. 11 to 18 Nay. Cocasionally, flights were made by a Fo-2, while the airfield lights were not in operation. 18 Nay. Source observed from the eastern edge of the field which was not guarded that cows were grazing in the southern section of the field. The ounce of the cows stated that no aircraft have been stationed at the field for about one week. However, source observed that solidiers wearing black-bordered blue epaulets still entered and left the field. 2. On 9 Nay, source determined that Unit Gonchar was still quartered in full strength at the field. There was intensive activity in the quartering area. No eigraft were observed three cities was at all titude of 500 neters. No eigraft were observed that field the closed bangars. Three ratil-read tank care were seen on the sure track. 6 to 9 May. There was no air activity. Three twin-engine semi-high-wing monoplanes with tail wheels and double rudder assemblies, apparently Tu-2s, were parked in the southern section of the field. 10 May. At about 11 a.m., a Po-2 took off. 11 May. Between 7 a.m. and 10 a.m., individual Tu-2s circled the field for about 15 minutes. At about 10:30 a.m., 3 Tu-2s took off heading south. The planes were not observed landing at the field. 11 to 18 May. Occasionally, flights were made by a Po-2, while the airfield lights were not in operation. 18 May. Source observed from the eastern edge of the field which was not guarded that cows were grazing in the southern section of the field. The owner of the cows stated that no aircraft have been stationed at the field for about one week. However, source observed that soldiers wearing black-bordered blue epaulets still entered and left the field. 2. On 9 May, source determined that Unit Gonchar was still quartered in full strength at the field. There was intensive activity in the quartering area. No air activity was observed. The ceiling was at an altitude of 500 meters. No aircraft were observed outside the closed hangars. Three rail-road tank cars were seen on the spur track. Mear the tank installation		the airfield lights were switched on.
